# I NY BEGINNER'S BIRDING CHALLENGE

Find these 10 common New York birds

Department of Environmental Conservation

Birding is an activity enjoyed by many New Yorkers of all ages and abilities and is a great way to connect with the outdoor world. Like people, different birds like to live in different places or habitats. The following common birds are typical of habitats in New York State. Use your observation skills and see if you can find these birds in their preferred habitats near your own home. Successfully complete your challenge and you will be entered into a drawing for fun birding accessories. Open to NYS residents 16 years old and younger.

## Northern Cardinal

The northern cardinal is one of the country's most distinguishable birds given the male's bright red color. The cardinal has slowly expanded its range northward and is now found in most states east of the Mississippi River. Male cardinals are bright red in color. Female cardinals are brownish-gray with red tinges on their crest (top of head), wings and tail.

## Northern Mockingbird

As its name implies, the mockingbird is famous for imitating the calls of other birds. Mockingbirds like to make their presence known by perching on fence posts and other prominent areas. They are very aggressive toward other birds entering their territory. Mockingbirds are gray-brown with white patches on their wings and outer tail feathers.

Length: 8 to 11 inches.
